GitHub Pages

GitHub Pages is designed to host your personal, organization, or project pages from a GitHub repository.

Build and deployment

Source

Deploy from a branch

Branch

Your GitHub Pages site is currently being built from the main branch. Learn more about configuring the publishing source for your site.

main   / (root)   Save

Learn how to add a Jekyll theme to your site.

Custom domain

Custom domains allow you to serve your site from a domain other than riyad-s.github.io. Learn more about configuring custom domains.

Save   Remove

☑ **Enforce HTTPS**

— Required for your site because you are using the default domain (riyad-s.github.io)

HTTPS provides a layer of encryption that prevents others from snooping on or tampering with traffic to your site.
